

You don't need the best insurance
until you need the best insurance.

Insuring Best-in-Class Companies

Long-lasting partnerships, fostering rate predictability and continued growth

Our portfolio is comprised of only the highest-quality fleets that have been carefully evaluated and approved through our rigorous underwriting process. We analyze billions of miles of data and factor for all developing market conditions to maintain an accurate and stable rating model for the companies that fit our selective criteria. This couples with a highly involved safety advancement focus to yield our results-driven approach.

We provide reliable coverage and support for businesses, creating long-lasting partnerships for continued growth, regardless of what economic or financial strains develop in the broader insurance industry.

Meticulous in Our Selectivity:

- Sustainable, long-term approach to how we price business and the accounts we accept into our portfolio.
- Our creative underwriting process uses deep understanding and thorough risk engineering analysis to qualify prospects.
- Facts and data analysis support every decision we make.

We don't compromise on these standards.

About Our Insureds:

- Our insureds have **44% fewer accidents than the national average.**
- By prioritizing safety and working hand in hand with DMC risk engineers, our insureds have reduced injury accidents by **17%**, saving lives, claim costs, and premium dollars as a result.

Underwriting Capabilities

Tailored insurance solutions that address the unique needs of trucking operations.

DMC has a **rich and customizable** product portfolio to solve your insurance needs, as well as the flexibility to consider standalone offerings. We **creatively manuscript solutions** for any level of risk appetite.

Fleet Trucking 35+ Units

- Primary and excess limits
- Alternative risk structures
- Creative collateral solutions
- Potential for multi-year terms
- Guaranteed cost, deductible, or retention options
- Flexible claims handling
- Several expense treatment options
- Enhanced coverage endorsements
- Property and Cargo liability coverages available
- Basket retention options

Excess Liability Coverage

- Supported or unsupported
- Retained limits or follow-form
- Corridors, quota shares, and structured elements
- Product-specific service package
- Flexible attachment points

Workers' Compensation

- Multiple policy options including deductible, excess, and retro
- Broad range of deductible/retention options
- Statutory limits
- Monoline coverage available
- Employers liability (stop gap) available with higher limits, as needed
- Basket retention options for WC where permitted

Independent Contractors

- Individual & master policy arrangements
- Non-trucking liability
- Physical damage
- Workers' compensation/occupational accident
- Various contingent liability solutions
- Wide array of options/endorsements

Claims Handling Expertise

Our claims staff is an investment, not an expense.

Our dedicated claims department consists of experienced professionals with specialized training in the nuances of trucking claims. The team adheres to strict timeliness and quality protocols for all claims activities, including a proprietary review process with the goal of “knowing the truth” as soon as possible. We utilize only vetted and approved trucking specialist attorneys and vendors who have proven themselves over time to understand the unique nature of our niche and are the foremost experts in modern trucking defense strategies. We manage all of our vendors with strict performance adherence expectations and know the best ways to listen to our expert partners and guide files toward optimal resolution.

We **consistently** produce superior results for DMC insureds by **actively managing** the entire claim process.

Fundamentals of Our Claims Process:

- Low caseloads for each claims specialist to ensure your claims get the attention they need
- High touches – Regimented regular file reviews
- Accurate reserving
- Actively handling and progressing cases
- Managerial oversight and participation
- Special Investigation Unit (SIU), surveillance, subrogation, and medical bill review

Proven Results for Our Insureds:

- Our clients have incurred ultimate allocated loss adjustment expenses (ALAE) costs that are **40% less than with their prior carriers.**
- **We’ve achieved \$72M of claims savings** over the past 5 years from tracked claims handling successes.
- DMC’s average bodily injury claim settles for **43% less than the competition.**
- For losses in the \$1M to \$5M range, our clients experience claim payouts **32% lower with DMC than they experienced before partnering with us.**

SUCCESS THROUGH PARTNERSHIP

Our insureds have collectively saved over **\$35M** by implementing the safety recommendations provided by our Risk Engineers.

Example Case Studies:

- The Risk Engineering team at DMC worked with a client to significantly reduce DOT accidents and Hours of Service infractions by supplying thorough analyses, predictive CSA score modeling, and educational resources. The adoption of an extensive communication plan, supported by the company's leadership, led to marked progress, **with a 19% decrease in DOT accidents and a 15% reduction in Hours of Service violations**, underscoring the success of their collaborative strategy.
- Our risk engineer pinpointed a pattern of increased accidents in two major cities for an insured, with one terminal in these cities responsible for most losses from 2019-2022. Our risk engineer worked directly with the insured's terminal manager, conducting on-site evaluations and providing best-practice materials and training. Management relayed these new safety strategies to the drivers. This led to the **previously highest-risk terminal achieving six months without any at-fault accidents**, highlighting the success of the effective partnerships between the insured and DMC for safer operations and substantial savings.
- An insured aiming to boost their CSA Unsafe Driving score collaborated with a DMC risk engineer on a data-driven safety campaign, pinpointing critical speeding hotspots and high-risk drivers. Insights from the Data Science department's thorough analysis of FMCSA data, identifying drivers with numerous violations, empowered the insured to address these high-risk individuals directly. This strategic approach **resulted in a notable 16% score improvement**.

Data Science

Providing actionable data for our insureds to promote proactive safety improvements.

DMC's Data Science services are a valuable resource available to our insureds. The amount of data our insureds obtain on a daily basis can be overwhelming. Special skills are needed to make sure the right things are being measured and determine where to focus valuable attention and resources. Our Data Science team collaborates with the insured and their DMC Risk Engineer to analyze the data and help filter it down to the highest risk concerns. Leveraging the expertise of DMC's data team translates to improved safety for our customers.

CASE STUDY

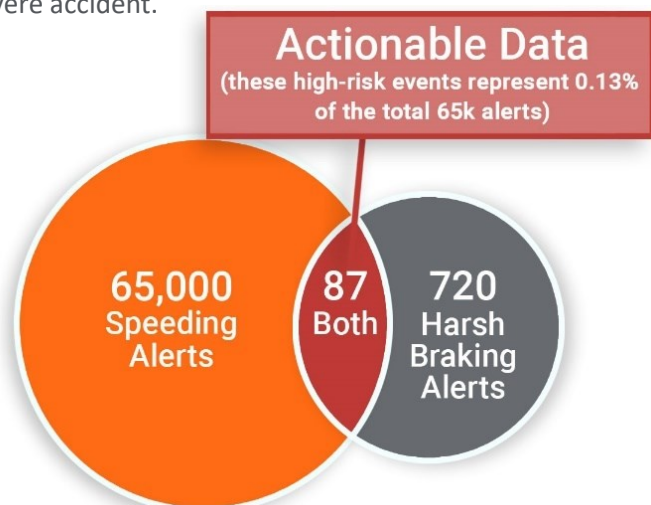

64%

57%

Using Data Science to Enhance Safety and Reduce Risk

An insured was looking for help assessing which driver violations they should address first. Our Risk Engineer and Data Science department analyzed the insured's driving data over a 12-month period. From this baseline, there were 65K system-triggered speeding events among 250 drivers at 15 different terminals. The insured was not equipped to identify where to prioritize resources. After some initial study of loss history by the DMC Risk Engineer, the Data Science team dug deeper to address the most concerning events. Together, they created a new event type where a speeding alert immediately preceded a hard-braking alert. In our Risk Engineer's opinion, this was indicative of speeding in congested areas or other situations that were more likely to result in a severe accident.

Starting from this prioritized alert combination, we were able to reduce the most critical observations by 99.9% and identify the small subset of drivers that gave rise to this new, more consequential event type. By isolating the most at-risk drivers of the large driving force, we were able to provide data-backed, targeted coaching opportunities for our insured's safety team.

Supporting Our Insureds and the Industry

Our commitment to the industry goes beyond providing exceptional financial coverage. We are intimately engaged in helping the industry progress by:

- Supporting our national and state industry associations through active membership, exhibiting, and sponsorship.
- Sponsoring important programs like Transport Topics' Trucking's Frontline Heroes award program, national and state-level truck driving championships, and other valuable recognition programs.
- Honoring driver excellence through our Driver of the Year Award program.
- Providing gifting programs for our insureds' drivers during National Truck Driver Appreciation Week and throughout the year.
- Working closely with trucking associations to achieve meaningful and lasting legal landscape improvements.

"Recognition programs like **DMC's Driver of the Year Award** are really important because they give the drivers a sense of being appreciated for doing what they need to do to be safe, and in this business, safety is number one."

— John Cole, Director of Safety at FirstFleet, Inc.

"The **Executive Risk Management Forum** was outstanding! 28 years of conferences, and it's refreshing to attend something so well organized, professional, and yet personal at the same time. I can recognize value and sustainability in the content, and DMC nailed it."

— David Guess, CFO at Usher Transport

EXECUTIVE RISK MANAGEMENT FORUM

Our invitation-only Executive Risk Management Forum brings together our insureds' executive leadership to focus on risk management as a business strategy. Attendees exchange ideas and learn insights from their colleagues, DMC executives, and other industry experts. Our guests walk away with actionable takeaways to help make significant improvements in their operations.

85% of attendees report they made lasting connections with fellow Executive Forum attendees.
