

Agency Level Binding Instructions

Agency level binding is now available in the GEICO Gateway for both Private Passenger and Commercial Auto where our products are available.

This feature allows Agency Principals to bind policies for their producers using an authorization code. It is designed to enhance productivity, allowing agents to focus more time on selling - less time processing, and reduce annual licensing costs.

1. For applications in a state that a producer is not licensed to do business, agents quoting in the GEICO Gateway will encounter a hard stop on the premium page of the quote. This prompt will instruct them to have their Agency Principal review the application and enter their authorization code.

2. The Agency Principal can review the application under the producer's login and then when prompted for the Principal Authorization Code, enter their National Producer Number. The Agency Principal can also open the quote under their GEICO Gateway login and continue to bind the quote as usual. If all criteria are successfully met, the policy will bind under the Agency Principal.
3. If the Agency Principal is not licensed or not appointed with GEICO in the state, the process will not complete, and the message below will display.

NOTE: While GEICO offers Just in Time appointments in many states, access to write business in California, Montana, Florida, Pennsylvania or Massachusetts requires a separate request to GAO@GEICO.com.
