

Eligible Dashcam Vendors

Ranked by TruckerCloud opt-in adoption | 21 active integrations

Effective April 2026 | All new policies and renewals require a cloud-based forward-facing dashcam

All QEO commercial auto policies require a forward-facing, telematics-enabled, cloud-based dashcam that is hardwired or diagnostic-port connected. The vendors below are QEO's preferred partners and are ranked by TruckerCloud opt-in adoption. Preferred vendors offer faster compliance verification and better data quality. Other cloud-platform telematics cameras may qualify; contact dashcams@qeo.com to verify.

If the insured selects a vendor that participates in TruckerCloud, the insured must opt in and authorize data sharing with QEO. Higher-ranked vendors have established TruckerCloud integrations that enable QEO to verify compliance, access telematics data, and support claims handling.

SD card cameras, consumer dashcams (Garmin, Rove, Nexar, etc.), and ELD-only devices do not qualify.

#	VENDOR	NOTES
1	Samsara PREFERRED	Market leader. Broad fleet adoption. For fleets larger than 11.
2	Motive PREFERRED	Strong mid-market presence. Formerly KeepTrucking.
3	GPSWebPro PREFERRED	QEO portal at gpsweb.pro/QEO . Lower cost option, available for small fleets.
4	Netradyne PREFERRED	AI-powered safety scoring.
5	Lytx PREFERRED	Industry legacy leader (DriveCam). Parent of Surfsight and RoadEasy.
6	Geotab PREFERRED	Major fleet platform. Serve single-truck operators through reseller network.
7	Surfsight	OEM/partner dashcam platform under Lytx umbrella.
8	Verizon Connect Reveal	Enterprise fleet management platform.
9	Azuga	Bridgestone subsidiary. Affordable entry for small fleets and Owner/Operators.
10	SmartDrive	Omnitracs product. Video-first safety platform.
11	IntelliShift	Integrated driver-i camera with fleet ops platform.
12	FleetComplete	Full fleet management suite with dashcam option.
13	Teletrac Navman	Global fleet management with video telematics.
14	GPSInsight	Fleet tracking with integrated dashcam option.
15	EyeRide	Connected dashcam with fleet tracking.
16	ForwardThinkingSystems	Fleet management with camera add-on.
17	LightMetrics	AI video telematics. OEM-focused distribution.
18	FleetHunt	GPS and dashcam combo platform.
19	RoadEasy	Budget-friendly AI dashcam. Affordable entry for small fleets and Owner/Operators.
20	Raven	Connected car platform with dashcam capability.
21	TXTDashCam	Dashcam with text-based event alerts. Low-cost entry. Works for small operations.

Key: ● High ● Moderate ● Lower PREFERRED = Recommend first for new business

Cloud storage is not cloud-platform telematics

Consumer dashcams like Garmin, Rove, and Nexar may offer cloud video storage or app-based clip retrieval, but they are not cloud-platform telematics systems. QEO requires a platform that delivers unified video, GPS, speed, and event data through a fleet management interface. Cloud backup of footage alone does not qualify. If the insured's provider participates in TruckerCloud, they must also complete the opt-in to share data with QEO.

Rankings reflect TruckerCloud opt-in adoption as of April 2026 based on QEO's active integrations. Subject to change. Contact dashcams@qeo.com for status.

Cloud-Based Dashcam Partners

QEO requires a road-facing cloud dashcam on all insured vehicles. We've done the work for you – every vendor below meets our standards and integrates directly with our claims and loss control team.

**Fewer Preventable Accidents
up to 20%**

**False Claims Dismissed
with video proof**

**Risky Driving Behaviors Reduced
up to 60%**

Pricing as of March 2026. GPS Web Pro, RoadEasy, and Azuga pricing reflects QEO contracted rates. All other vendors, contact directly for fleet-specific quotes, as pricing varies by volume and contract length. Rankings reflect adoption across QEO insured fleets.

* Performance statistics based on published industry fleet safety data. Individual results may vary.

Quick Reference

Common scenarios during the quote and renewal process

Insured already has a dashcam

If the camera is forward-facing, telematics-enabled, cloud-based, and hardwired or diagnostic-port connected, it meets QEO's requirements. If the vendor is on the preferred list above, confirm TruckerCloud opt-in status. SD card cameras and consumer dashcams (Garmin, Rove, Nexar) do not qualify and will need to be replaced with a cloud-platform option.

Insured has a cloud-storage dashcam (Garmin, Nexar, etc.)

Cloud video storage or app-based clip retrieval is not the same as cloud-platform telematics. QEO requires a system that delivers GPS, speed, and event data through a fleet management platform. Cameras that only store footage in the cloud do not qualify.

Insured's vendor is not on the preferred list

The insured's camera vendor is not on QEO's preferred vendor list. If the camera meets QEO's requirements (forward-facing, cloud-based, telematics-enabled, hardwired or diagnostic-port connected), it may still qualify. Contact dashcams@qeo.com to verify. If the vendor participates in TruckerCloud, the insured will be required to opt in.

Insured has a TruckerCloud-compatible camera but has not opted in

If the insured's dashcam provider participates in TruckerCloud, the insured must complete the opt-in and authorize data sharing with QEO. This is a requirement of the policy when the provider is TruckerCloud-compatible. Direct the insured to the TruckerCloud onboarding link or contact dashcams@qeo.com for assistance. [QEO x TruckerCloud Onboarding Page](#)

Insured asks about ELDs

QEO's requirement is specifically for cloud-based dashcam platforms with a forward-facing camera. ELD-only devices do not satisfy the dashcam requirement, even if the ELD vendor integrates with TruckerCloud for GPS or hours-of-service data.

Insured pushes back on cost

Most fleets already have an ELD or dashcam that connects for free. For those who need a camera, one exonerated claim pays for years of cameras. 40% of fleets report lower premiums after installation. Cameras start as low as \$199 with monthly plans under \$30.

Insured says drivers don't want to be monitored

The camera faces the road, not the driver. When a four-wheeler causes an accident and their attorney comes calling, this footage protects the driver's CDL and livelihood. This is protection, not surveillance.

For agent and internal use. Vendor list reflects QEO's active TruckerCloud integrations as of April 2026. Contact dashcams@qeo.com for current vendor status or escalations.
